ON-THE-JOB OBSERVATION POINT and ALUMINIUM TOOLBOX

The Main Objective

The general objective of the **AluVET Project** is to enhance and elevate the proficiencies of metal technology professional educators and students with a specific focus on the light metals sector, particularly aluminum. This project aims to address the evolving needs of the industry by providing a new industry-oriented training program that supports the existing curriculum.

The main objective of the **on-the-job observation platform** is to provide VET teachers, students, and blue-collar workers in the aluminum sector with real-world exposure and practical experiences in the industry.

Why to apply?

Participating as an on-the-job observation point in the AluVET project provides an excellent opportunity for companies in the Light Metals sector to showcase their cutting-edge equipment and processes, contribute to the upskilling of VET teachers and students, and strengthen their collaboration with the education sector, ultimately fostering a skilled and industry-ready workforce.

Who Can Apply?

The type of company that can take on the role of on-the-job observation points would typically be companies operating as:

- Aluminum manufacturing
- Aluminum fabrication
- Aluminum recycling
- Aluminum surface treatment
- Aluminum die-casting
- Aluminum extrusion
- Aluminum machining and tooling companies
- Aluminum research and development (R&D) centers

How It Works?
